PC2308 Instruction Manual

NOTICE OF ASSEMBLE

Tips for Assembling Wood

Find the corresponding block number, use a knife in the connection point gently press, you can take out the wood.

Use a knife to smooth out the burr.

Or use sandpaper to smooth out the burr

Testing on LED function

Be sure to test the LED lights before making the lighting, note that the LED white wire to the negative, gray wire to the positive reference to the following figure operation test.

1

DO NOT contact the LED wire end direct to the battery cell.

2

Use the provide battery holder. Make sue the correct polarity.

How to assemble the battery holder

1. Material and tools needed:
- Battery holder, LED bulb,
tape, screw driver and 2 pieces
AAA size battery(not provided)

2. Use screw driver and
take the lid off from the
battery holder.

3. Insert the battery take
notes on the polarity.

4. Connect the red wire
to grey wire. Connect
the black wire to white
wire.

5. Wrap the exposed wire
with the tapes.

6. Place the box lid and
fastness with screw driver.

combination part
according to  so on.

About the use of glue

Method for using glue:

1. After applying the glue, let it dry for a few seconds before pasting.
2. Fix it slightly with your hands, and finally put it aside to dry;

Tips:

When pasting the plane printing paper, a piece of waste bank card or telephone card can be used to wipe evenly after the glue is smeared on the wood board, and then the printing paper is pasted to squeeze out the air inside.

Types of glue:

White latex: Used for adhering soft materials, such as wood and paper.

Alcoholic Glue: Used for adhering hard materials such as cloth, plastic, beads, wire, dust cover, etc.

Installation Of Battery Box

Disclaimer: This wire cannot be plugged into the output socket

- LED lights before use, should can test the light
- Can use two AAA batteries
- The positive and negative poles of the battery are aligned and the battery is installed
- Non-rechargeable batteries, cannot be charged
- Rechargeable batteries can only be charged under adult supervision
- Rechargeable batteries should be removed from the toy before charging
- Different types of batteries or old and new batteries cannot be mixed
- Batteries should be inserted with correct polarity
- Exhausted batteries should be removed from the toy
- The power terminal must not be short-circuited

1

Strip 1 cm of rubber off the ends of all wires

2

Connect the black line of the battery box with the LED white line, and the red line of the battery box with the gray LED gray line respectively

3

4

Wrap the exposed wires with H03

5

Hide the battery box

6

Finally, turn on the switch to light the led

The instruction manual should be keep,after assembled.
